

Niche Segments

CANS/SEAMING INDUSTRY

CFT Seaming has manufactured seaming equipment for over 50 years and continues to focus on strengthening our world-wide presence for medium and high speed seaming solutions. The company manufactures all required chucks and rolls in house which provides a huge benefit to end-users and can manufacturers alike.

12 heads Seamer

LUBE OIL INDUSTRY

Comaco provides both independent unit and complete turn-key filling and packaging lines for these niche markets. Comaco has built a strong reputation in working with independent producers and large corporations for cans, pail, and plastic containers (from 0.5 to 1,000 Kg) and has participated in impressive installations in some of the world's leading production facilities.

Volumetric filler/seamer 40/6

PROCESSING INDUSTRY

CFT can provide a vast amount of experience and technology through our processing range of equipment for the Beverage and Food Industries. Fruit & Vegetable Treatment, Syrup Rooms, Saturators, Premix, Flash Pasteurizers (for several applications) and CIP units are manufactured in house and are part of the production program

A GLOBAL COMPANY PROVIDING A GLOBAL SERVICE

CFT PACKAGING USA is a systems provider of technically innovative, high quality, filling and packaging equipment for the beverage and food industry. A subsidiary of global leader, CFT Packaging S.P.A, the company can attribute to over 50 years of Food & Beverage applications and can account for thousands of successful installations world-wide.

What makes CFT Packaging USA the correct choice for any client is the compilation of companies which are directly managed under the corporate umbrella. Industry leading organizations, such as Rossi & Catelli, Comaco, Sima, and SBC Bottling & Canning, have maintained a leading presence in their respected industry segments for many years and continue to be synonymous with excellent performance and reliability.

CFT's global strategy is to continue building on our strong, well-rounded product portfolio through dynamic engineering and equipment design. As a group, CFT has the ability to provide single machines or complete turn-key lines.

A strong benefit for our clients is that a majority of the equipment is manufactured in house, allowing CFT to provide an approach which ensures one point of contact for our customers throughout all the project stages.

Equal to CFT's concentration on machine construction, is our focus on maintaining a high-level of customer satisfaction and repeatability. The mission of the company is to provide continuous support to customers of all sizes and maintain "Customers for Life" through a hands-on support structure, effective communication, and knowledgeable customer service support team.

The combination of reliable equipment, hands-on service, and a full team to support the day to day operation for each client, is the reason CFT Packaging USA continues to be recognized as a Global Company Providing a Global Service.

CFT Packaging USA relies on the professionalism of a qualified technical team and a well established North American operation which has serviced and satisfied clients for over a decade.

Beverage Applications

SBC Bottling & Canning has been a leader in the Beverage Industry for over 50 years and continues to pioneer the industry through development, design and manufacturing of filling equipment for all applications: SBC provides a wide range of filling machinery to handle applications for still and carbonated beverages through our use of counter-pressure, gravity, and hot fill machines by means of mechanic or electronic valve technology. Special solutions are available for multi-product and/or multi-container application as required (typically interesting for co packers, where flexibility and reliability are the keys of success).

The fields of application, both in the supply of individual machines and integrated plants for glass, PET, rigid plastic, aluminium and steel are:

Beverage: beer, fruit and vegetable juices, soft drinks, energy and isotonic drinks, teas, waters, wines, spirits.

Counterpressure rinser/filler/capper Master RS 50/50/10

Food Applications

The Sima and Comaco range of equipment are recognized as leaders in the design and manufacturing of filling equipment dedicated to the Food Industry.

Sima and Comaco provide a vast range of fill equipment consisting of: gravity, vacuum, volumetric and weight fill systems by means of mechanical and electronic valve technology.

The fields of application, both in the supply of individual machines and integrated plants for glass,

Volumetric blower/filler/capper 40/40/10

PET, rigid plastic, aluminium and steel are:

Food: tomato and by-products, vegetables, preserves, jams, sauces, dressings, mayonnaise, ketchup, soups, ready meals, meat, tuna, pâté, edible oils, condensed and evaporated milk, special beverages, wet pet-food.

Special solutions are available for multi-product and/or multi-container applications as required.

Packaging Applications

Specific teams are dedicated to engineering and design for secondary packaging equipment. The company can supply complete packaging lines or end of line equipment solutions as required. CFT manufactures in house: high-level Depalletizers and Palletizers, Conveyor Systems and all the required logic control (fundamental in turn-key line applications).
